

What the app costs, laid out plainly

You pay once. There's nothing monthly after that,
and no store fees on your side.

₦1,200,000

paid once

WHAT'S INCLUDED

Designed in your name

Set up in your logo and colours, so it's clearly your brand.

₦180,000

Customers see your menu and order

They look through your cakes and order in a few taps.

₦250,000

They pay and follow the order

They pay in the app and watch it go from accepted to on its way.

₦200,000

You take and manage orders

Orders reach your phone. Accept, set the time, send a rider.

₦230,000

You control the menu and prices

Add a cake, change a price, or mark sold out yourself, any time.

₦140,000

Getting it live, plus your first month

I put it on the Play Store and stay on hand for 30 days after.

₦200,000

Total

Paid once. Nothing monthly.

₦1,200,000

Paying for it

Half

₦600,000 to begin

So I can block out the time and start

Half

₦600,000 when it's live

You pay the rest once it's in the store and working

Things you won't be billed for

-  No monthly fee. You're not renting it.
-  No store charges on your side.
-  No extra bill for the ordering and payment part. It's already built, and it's in the price.

Most of your customers are on **Android**, so we start there. The **iPhone** version can be turned on later whenever you want it. It's the same app, so there's no building it twice.
