

Cost to build your app

A one-time fee to design, build and launch both apps. Ongoing upkeep is a small yearly cost, set out below.

₦1,200,000

one-time build

WHAT'S INCLUDED

UI design & your branding

A reusable component set with your logo and colours across both apps.

₦150,000

Customer app

Menu browsing, product pages, cart and the checkout flow.

₦220,000

Payment integration

In-app payments through the gateway, with confirmation handling.

₦150,000

Real-time tracking & push notifications

Live status (accepted, preparing, on the way, delivered) with a push at each stage.

₦180,000

Admin app

Order queue, accept/decline, status flow, prep times and rider dispatch.

₦230,000

Backend & API integration

Wiring both apps to the ordering and payment backend, with order sync.

₦150,000

Testing, store deployment & support

Device testing, publishing to the app stores, and 30 days of post-launch fixes.

₦120,000

Total

One-time build fee

₦1,200,000

Payment schedule

50%

₦600,000 to begin

Confirms the project and reserves the build dates

50%

₦600,000 on launch

Due once the app is live in the store

After launch

- A yearly maintenance plan of **₦60,000/year** keeps the apps published and updated, and covers minor fixes. Scoped with you before launch.
- Any features beyond what's listed above are **quoted and agreed separately** before work begins.
