

What the app costs, laid out plainly

You pay once. There's nothing monthly after that,
and no store fees on your side.

₦1,200,000

paid once

WHAT'S INCLUDED

UI design & your branding

A reusable component set with your logo and colours across both apps.

₦150,000

Customer app

Menu browsing, product pages, cart and the checkout flow.

₦220,000

Payment integration

In-app payments through the gateway, with confirmation handling.

₦150,000

Real-time tracking & push notifications

Live status (accepted, preparing, on the way, delivered) with a push at each stage.

₦180,000

Admin app

Order queue, accept/decline, status flow, prep times and rider dispatch.

₦230,000

Backend & API integration

Wiring both apps to the ordering and payment backend, with order sync.

₦150,000

Testing, store deployment & support

Device testing, publishing to the app stores, and 30 days of post-launch fixes.

₦120,000

Total

Paid once. Nothing monthly.

₦1,200,000

Paying for it

Half

₦600,000 to begin

So I can block out the time and start

Half

₦600,000 when it's live

You pay the rest once it's in the store and working

✓ Things you won't be billed for

- ✓ No monthly fee. You're not renting it.
- ✓ No store charges on your side.
- ✓ No extra bill for the ordering and payment part. It's already built, and it's in the price.
